A haemoglobin test is often used to check for anemie, a condition in which the body has fewer red blood cells than normal.

In the camp, the haemoglobin test was done for a total of 102 College and School students (53female and 47male). Out of the 102students. only 6 of them were found to have their haemoglobin level below 5, whereas the level of others was above 10.
